

Write a program which creates two threads, one thread display -
 -Pug BMS college of Engineering once every ten seconds and
 another display Pug CSE once every two seconds.

class NewThread implements Runnable

```

{
    Thread t;
    NewThread()
    {
        t = new Thread(this, "NThread");
        t.start();
    }
    public void run()
    {
        try
        {
            for (int n = 1; n > 0; n++)
            {
                System.out.println("CSE");
                Thread.sleep(2000);
            }
        }
        catch (InterruptedException e)
        {
            System.out.println("Thread is interrupted");
        }
    }
}

```

class Thread2

```

{
    public static void main(String args[])
    {
        NewThread nt1 = new NewThread();
        try
        {
            for (int n = 1; n > 0; n++)
            {

```

System.out.println("BMS College of Engineering");
Thread.sleep(10000);

}
}
while (interruptedException != null)

{
System.out.println("Thread 2 Interrupted");

}
}
}

```
